

6516206141.txt

Gentlemen -

As a devoted satellite radio (XM specifically) fan, I'm appalled that someone is trying to limit what I listen to. Local weather and news should not be limited to broadcast only, unless you in your infinite wisdom wish to redesign the broadcast network (and create the technology) to make FM work beyond line of sight.

XM is a wonderful piece of technology, and again, lobbyist are trying to shunt it's capability.

Please let well enough alone....

Rich Hawley
